Parliament of Australia

Department of Parliamentary Services

Information Circular No: **2011/34** Date: 14 July 2011

TO: SENATORS, MEMBERS AND OTHER BUILDING OCCUPANTS

Maintenance affecting operation of the lifts

1 DPS needs to undertake a maintenance shutdown of the switchboard that provides power to the lifts near the front of the building. The shutdown is required to enhance the power supply to the Parliament House basement computing facilities.

2 The work is scheduled to be undertaken between 7.30pm and midnight on Saturday 16 July 2011. The dates and times have been selected to minimise interruption to the normal business of Parliament House.

3 The interruption to the electrical supply means that there will be no power to lifts 12 through to lift 23 inclusive (see attached map); lighting to stairwells within this area will also be affected.

4 Temporary lighting will be used in affected stairwells.

5 Signs will be posted on the affected lifts and will show where the closest lift can be located.

6 If you feel this occurrence of restricted access will affect you please contact the project managers below.

7 For emergency please contact the Parliamentary Security Operations Room on 6277 5999.

8 For further information please contact the project manager Steven Kopievsky on 6277 5031 (mob 0429 301 623) or email steven.kopivesky@aph.gov.au or Cain Howell on 6277 5044 (mob 0434 566 448) or email cain.howell@aph.gov.au.
