

I would like to support this bill. As a taxpayer I would like to see my hard earned wages spent on things of great value to society. Murdering a helpless unborn child out of convenience (i.e. I wanted a boy, not a girl) is definitely not a health issue that should be funded by the government. I'm stunned that this is even allowed!!- what happened to gender equality? what happened to the basic right to life? Surely the government should be doing everything it can (with taxpayer earned dollars) to reduce abortion, not support it.
