

Submission to Senate committee

I believe that abortion is generally wrong, but to allow abortion in order to select gender, is virtually bringing human life down to the level of selecting which colour or make of car to buy, or which suburb to build or buy a house.

If people wish to be this selfish, I believe they should be taught proper contraception methods so that they don't conceive a child at all.

I believe Medicare funding should be used only for prolonging healthy life, not for ending it.
