

Inquiry: Health Insurance Amendment (Medicare Funding for Certain Types of Abortion) Bill 2013.

The suggestion that taxpayer funds are to be use by those to procure an abortion for sex selection is to be utterly rejected.

I am opposed to all forms of abortion but even people who are open to abortion reject it on the basis of sex selection because it relegates human beings to the importance of choosing for example the colour of your next car. It trivialises life and opens our society to a culture where human life is afforded no respect or protection for those born or unborn.

In countries like China we see the devastating effects of 450 million abortions and most of those are baby girls.

It would seem that modern day Australia is starting to embrace the eugenics policies of Margaret Sanger and Mr. Hitler.

The argument for abortion is the same argument submitted for slavery and genocide.

All unborn babies are Australian citizens. By what right does one human being eliminate another?

The disabled are particularly targeted by the medical profession with abortion.

Stop using my tax funds to take the life of my fellow Australians.
