

---

Hello

My name is Nayia Theodorou and I am a mother, wife and an educated person. When I read that this bill was being proposed I realised that the moral fibre of our society was at stake. A progressive civilised society is one that protects its vulnerable ones. A barbaric one is one that sacrifices them to their unknown god. Abortion is murder in the name of the god of semantics. If we can't protect a foetus what kind of society are we?

I could use United Nations Laws etc to defend the rights of an unborn child, but instead I will appeal to anyone with common sense and human dignity not to be swept by the trends of relativism (the cancer that is tearing society apart).

I believe that politicians are elected to defend the law not to alter it to suit certain interest groups. There is an economic crisis out there. The public knows it and politicians should stop using these ridiculous smokescreen bills( including same sex marriage) to fool the public. Politicians are wasting our money putting forward ridiculous bills.

The silent majority/grass roots will speak one day, and politician's jobs will be the first to go.

Regards

Nayia Theodorou B.Ec. ACA
