

---

To whom it may concern,

Abortion in itself is such a sensitive matter and should be based purely on extreme or medical circumstances and not on cultural and/or personal preference. I believe Medicare funding for abortions based on gender is extremely unorthodox.

Human beings deserve the right to live and be accepted regardless of gender furthermore it's the duty of our legislators to uphold this. Our laws should not only speak up for children but protect the unborn equally.

We as taxpayers would rather see our hard earned money being used for medical reasons and not just for people's gender choices whatever the reason. Lastly permitting funds would also mean a tremendous increase in the abortion rates.

Please consider carefully

Yours sincerely
