

To the Senate committee for the Health Insurance Amendment (Medicare Funding for Certain Types of Abortion) Bill, 2013,

I wish to record my support for this Bill, on the basis that choosing the gender of a baby is not a medical procedure and should not be funded by Medicare.

Those elected to govern this country have the responsibility to ensure all babies are given their most basic human right, that is to live, especially where there are no medical reasons for denying them this right.

Thank you for considering my submission
