We are just children, we are healthy and happy and don't want to be made sick because of the windtowers being placed too close to our little family home. We know a lot of people who have become very sick and sad because their bodies have been badly effected by the blades spinning, vibrating the water in their good brains and their whole body. We even think it has a bad ripple effect in peoples bodies. We might become scientists or politicians so we can make changes to the local areas decision makers. We need good healthy decision makers.
