

I haven't ever contacted any politician before so not sure how to word this.

I have sever sleep apnoea, depression, anxiety, PTSD, constant pain from a serious hand accident where I lost my left ring finger. At the moment I am on 6 different medications to help with the said ailments. I find I am a walking zombie and find it hard to just think from the side effects. I have even lost my job because I can't do more than 2 hours of work a day from the constant fatigue and pain. When it was suggested to try cannabis I did, that night my pain was gone and I had the best night sleep I have had for decades without the side effects of the prescribed medications.

has fibromyalgia and is in constant pain and is also on many medications which have become ineffective. When tried cannabis her pain also was totally relieved. So I implore you to please make available medicinal cannabis for those who need it. Not just for the terminal ill. I must state that God created all seed bearing plants for our use. Yes I am a Christian and need to have cannabis made available for relief.
