

Sydney Research centre to open soon.

Aljen Projects is working for the community.

Our mission “without action we go nowhere”.

This is where the necessity of legalising Cannabis for Medicine is warranted within our society.

I have the website [www.cannabissoulhealing.com](http://www.cannabissoulhealing.com) this website is spiking interest in Australia with the need we currently have for Cannabis high quality products.

The government has within NSW put out for trials which I have tendered for. Yet what I have seen is a variety of people requiring product and receiving far from this I have thought.

I asked Dr Andrew Katelaris whether in July 2014 even before this it could be would the Cannabis oil help Mr Graeme Weatherstone a patient of Cancer Care St George Hospital since 2011 with Mantle Cell Lymphoma. He told me he couldn't help him, he focuses on the Epilepsy. Dr Andrew Katelaris asked me to join him on research to further understand and find solutions. This I have been doing on my own from 2011 when I door knocked in 2012 Australian Medical Institute on a product which affects the pons part of the brain for children's brain cancer where there is no hope at the moment.

Over the last weeks I have been working with one of the Researchers for Australian Medical Institute on the cannabis and how the body chemistry is a link to further understanding how to lessen the pain in terminal illness.

We have cancer patients having Methadone, utilising Heroin for the pain management and it seems to some extent our answer has been synthetic drugs.

Cannabis helps as it is a plant extract for the blood brain barrier. Yet at the moment we have self diagnosis for the Cannabis and the research for the THC benefits on fighting cancer with reports from

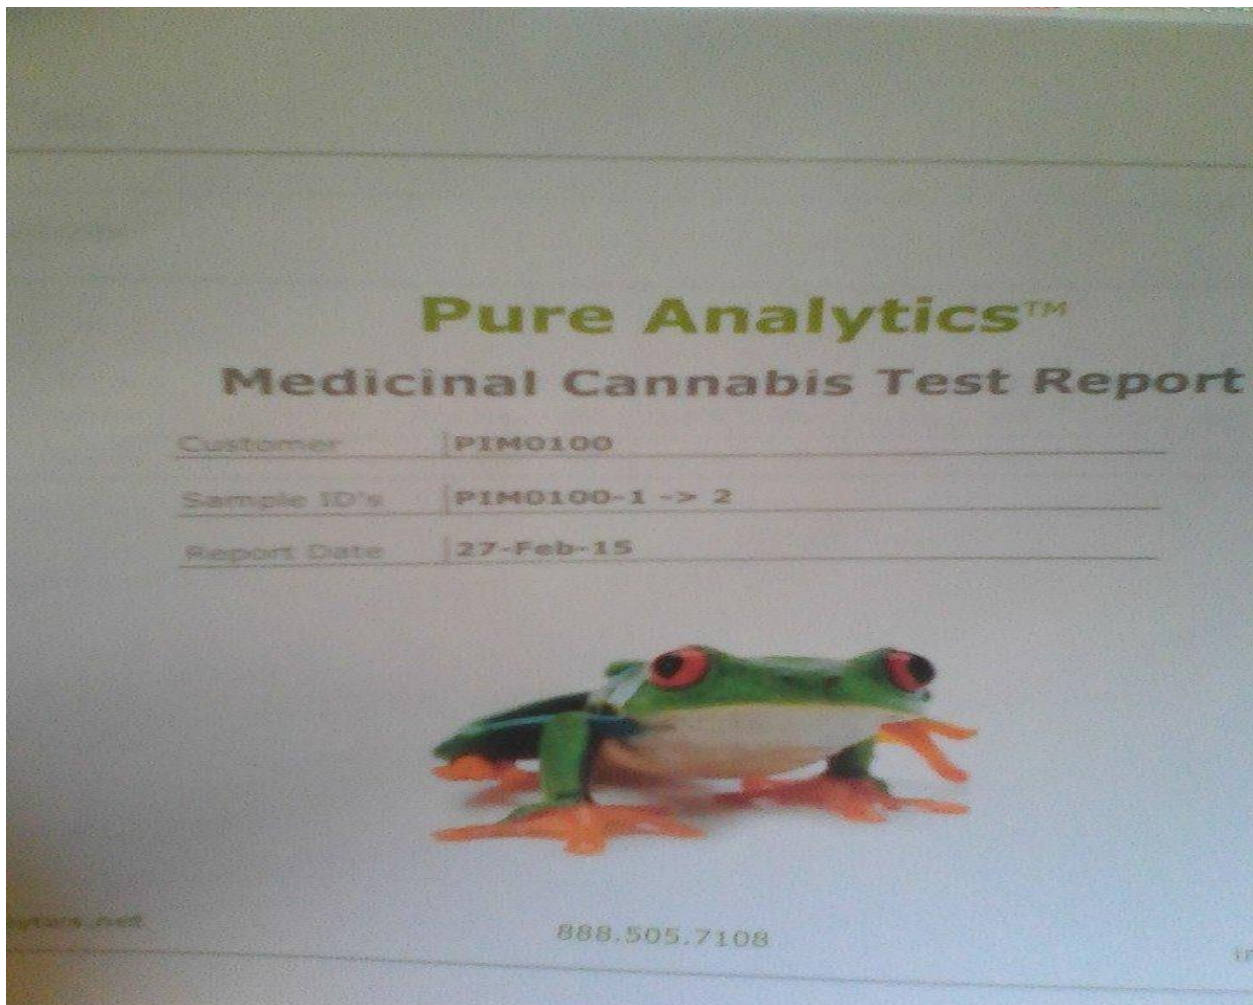

telling people he took 5 grams a day is in some regards very dangerous to the serious ill. Many people could not take this much product.

When the product is highly concentrated less is best.

When a patient utilises the THCA or THCV for Epilepsy the smallest dose to work is the best as when more is taken it is found it is no other benefit for the patient.

I have asked Don Medical Cannabis and other Cannabis tendering companies on open forum's for the research benefits of healing the sick to be debated however no one has been accepting a nice discussion on how to heal the sick.

I have seen patients needing high end products here is a sample of a test report from USA.

Medicinal Cannabis Certificate of Analysis													
Sample Information					Cannabinoid Potency Results								
Member Club	Peace in Medicine												
Strain Name	Mixed

Resin Gland Density	NA												
Resin Gland Color: %	NA Amber		NA Clear										
Resin Gland Clarity: %	NA Opaque		NA Translucent										
Maturity Rating	NA												
Safety Screening Results:					Discussion of Results								
Mold and Fungus Screening			Pesticides Analysis		<p>This sample was found to be THC dominant cannabis of strong potency with an accompanying low level of CBD, CBG and CBN. Due to the high potency level of this cannabis it should be administered with care to those patients who can well-tolerate the intoxicating effects. Studies have shown that patients who suffer from anxiety, schizophrenia and related disorders may have an adverse reaction to THC. This cannabis may be suitable for patients seeking extended, strong relief from THC-related ailments such as pain, nausea, insomnia, loss of appetite, depression and others as determined by a healthcare provider. The low level of CBD present may prolong the effects of THC-therapy and provide relief from chronic pain due to inflammation, muscle spasticity and convulsion and may provide relief from feelings of anxiety. The low level of CBG present may provide added relief from pain, inflammation and the symptoms of glaucoma. In the growing plant, CBG is the precursor to THC and CBD formation. An excess of CBG may indicate additional maturation time could yield higher THC and CBD potency levels. The CBN present may cause feelings of grogginess, may reduce heart rate and alleviate the effects of muscle convulsions.</p>

For Australia product testing facility I have found is Steep Hill which is recognized in America also.

At the moment many patients are healing themselves without properly tested products. It is interesting when you work with the high quality products the products are far more effective on the patient as this Green Dragon is left at the gate as some call the alcoholic tinctures without much raw product within.

When we rebalance the chemicals within our bodies it aligns the body allowing the cancer to be easier treated and the herbal remedies come into play with treatment as Cannabis can cross the blood brain barrier.

I have talked to patients about the body chemistry which is on the website Cannabissoulhealing.com by balancing the body cancer can be allegedly eliminated by what I have observed.

We need the companies that are working for the Cannabis supply to be utilising far better testing facilities than a personal machine for a person who wants to know which cannabis strain they are utilising.

Cannabis legalising is happening around the world and I hope Aljen Projects can help the sick, terminal patients even with the life challenged patients where Cannabis can be of aid.

## BODY OUT OF BALANCE?

When someone is seriously sick it could affect the Minerals which in turn affect the Hormones and Amino Acids of the person.

When no one can find a problem and you feel sick please ask about these blood tests with your local Doctor.

Food and water are by far the most logical sources, and yet both delivery systems have become so mineral deficient and/or polluted that they are poor sources for a full compliment of one's essential daily mineral intake especially for the sick. As a result we have become a minerally deficient society. Results of supplementing with inorganic ionic minerals speak to the effectiveness of inorganic individual ionic elements (not bonded to carbon) and can therefore attest to the fact that the body does not need its minerals bonded to carbon for beneficial absorption and utilization. It is therefore the belief of this author, based upon personal history and the history of the human race (with observation and results), that the body intuitively knows what to do with minerals regardless of the form in which they come, and if it didn't, we would not be alive."

### Suggested Minerals & "B" Vitamins

With Lab Codes for

Recommended Blood tests to provide better biochemistry interpretation:

(Urine tests will give different values) Every patient with cancer has missing peptides in the urine.

Lymphona patients high triglycerides is a link to the lymph content in the body.

CPT	Code	Mineral	Normal Range
82108	Al	Aluminum	0 - 15.0ug/L
82175	As	Arsenic	0 - 13.0ug/L
83018	Bi	Bismuth	0 - 5.0ug/L
82300	Cd	Cadmium	0 - 5.0ug/L
82310	Ca	Calcium	8.5 - 10.1mg/dL
82435	Cl	Chloride	98 - 107.0mmol/L
83789	Co	Cobalt	≤ 1.0ug/L
82495	Cr	Chromium	≤ 5.0ug/L

82306 Vitamin D Calcifediol

82307 Vitamin D3 Calcifediol

82652 Dihydroxyvitamin D

What I have noticed people who have cancer seem to have the CB1 receptor not working by my observance and by taking Cannabis the CB1 receptor starts working.

We have to stop thinking about Cancer as a terminal illness and looking at the cause, where the action of chemotherapy works on the cells being removed we also have to look at realigning the body for the health of the person.

I have been going in and out of Cancer departments from 2011 to now. I have worked with cancer victims from 1980. I know as my observance we balance the body, the person has far less pain and lives a quality of life for longer.

I have watched how the Police in Northern NSW Rivers have removed plants. I would like it noted the quality for Cannabis to a medicine component needs full nutrients within the growing cycle.

DEFICIENCY AND ABUNDANCE OF FERTILIZATION ELEMENTS

( pictures by Xose Cervantes, edited by SRV)

*Look at the minerals noted which would be in the perfect Cannabis. Nitrogen, Phosphorus, Potassium, Magnesium, Sulfur, Zinc, Manganese and Iron.*

*MRI - DIPG growing in brain*

*Normal MRI*

This is what I have been studying DIPG in children a 100% death rate in this country Australia.

It relates to the liquid in the brain and the pons part of the brain which you can see with swelling.

When I put up the website [cannabissoulhealing.com](http://cannabissoulhealing.com) I had families in the United States wanting to be able to join in on the research. Yet most Doctor's who deal with cancer patients tell them to not take vitamins. Ashame when this could help alleviate the aggression this cancer works with.

I have been working to expose the underground drug network in Kings Cross through The Kings Cross Sting series where two people expose the murders, the missing people and how the drug network control is hidden within our society. I hope the government works with people that will look at the submissions on the research as the license for the crops will in fact within the wrong hands help boost the underground drug network.

I hope the government can see, Cannabis is a carrier of the minerals to the body and within the plant option with the high THC can give patients the opportunity to fight cancer in their own homes. I hope Aljen Projects will be working with these people in the near future.

Without action we go nowhere. Please allow the Cannabis Tender of Aljen Projects be a guide as this country with the right research team can become the leaders in the world of DIPG Cancer.

When the hospital staff St George Hospital Cancer Care unit Dr Lisa explained to me, if I had a problem with Chemotherapy that wasn't working I had to write to the Coroner even thou Graeme is alive.

As I have written again for the blood body chemistry tests to happen again, Cannabis is just an aid for the rebalancing of the body with supplements like Dr Gerson had Potassium 10% added to the clients

diet, we have Magnesium within the 300 chemical reactions of the bodies 500 chemical reactions we have in our own body. Cannabis has a high concentration of Magnesium within the products.

Vote Yes for Cannabis to be utilised as a Medicine with support system for the patient. This will I hope keep the illegal drug addicts from the program.

Regards,

Jennifer Weatherstone
