**Subject : AUSTRALIAN PARLIAMENT OF AUSTRALIA HOUSE OF REPRESENTATIVES – NEW INQUIRY INTO THE REGISTER OF ENVIRONMENT ORGANIZATIONS**

**To : Standing Committee on the Environment; PO Box 6021, Parliament House, Canberra, Australian Capital Territory ACT 2600, Australia.**

Dear sirs, With reference to the letter that I received with the date of 31 March 2015 and the website ([www.aph.gov.au/Committee/Submissions](http://www.aph.gov.au/Committee/Submissions)), I would like to make my submission as follows with the inclusion of such environmental consciousness program below as listed in your activities for environmental organizations under your register :

Project title : Zero Waste City of Greater Dandenong, Victoria of Australia. The main portion is to develop a household with solid waste minimisation with approaching 100 % recycling. The second portion is to develop edible garden with fruit and vegetable plantation with decorative, medicinal and edible values. The third portion is water saving by using rain water for gardening purposes. More waste and rubbish could be recycled into useful materials by proper arrangement of fruit and food wastes before throwing. Special storm water pipe could be installed in individual households to get free rain water for flushing the toilet, watering of garden and cleaning the house. The used water of dirt to clean the floor could be very useful for plants at dry and hot seasons. Other containers, papers, cardboards, bottles and aluminium cans could be distributed properly to recycled bin rather than throwing away as rubbish. Thank you.

Regards,  
Chuen-Tat Kang (江俊达),
