

To Whom It May Concern:

I support the bill to reconsider Medicare funding for sex selective abortions. Abortion based on the gender of the unborn child is not a medical procedure; it is murder and should not be funded by Medicare.

If the fetus has a gender, and heart beat and resembles a baby, I do not understand how it could be justified aborting the child and calling it a medical procedure.

I believe that the unborn should be protected. I support this bill as it ensures unborn children are afforded the most basic of human rights: life.

Sincerely,  
Josie Nancarrow
