

To whom it may concern:

I was a participant in Canada's Medical Marijuana Program.

I was also one of the Directors of a nonprofit dedicated to supporting its members in accessing medicinal cannabis in a "harm reduction" capacity.

I believe that a similar system could be set up in Australia that would satisfy all stakeholders in this process: distributors, growers, law enforcement, sick people, and the general public.

I would appreciate the opportunity to consult in this process.

Yours faithfully,

Douglas M. Brown
