Hi,

I don't like writing in and am afraid I'm so badly informed that I don't know the whole story.

However, the information I have is that \$1.3 billion is being cut from ARENA, Australia's renewable energy agency.

Attacking Australia's renewable energy industry is bad enough - but the cuts to ARENA are also yet another assault on CSIRO.

More than 120 CSIRO researchers are funded by ARENA. Dismantling ARENA's amazing renewable energy work leaves 120 more CSIRO scientists at risk.

Regards
Bryan Tingey
