Re Submission for the Social and Economic Impact of Rural Wind Farms

Dear Senators,

I write in support of rural wind farms.

It's time people woke up to the effects of global warming, and what it's doing not only to our Country, but to the world.

Without projects such as these windfarms, environmental disasters similar to the ones we've been seeing lately; Category 5 cyclones in Queensland, not to mention the floods that have not only had the highest levels recorded in QLD, but ALL OVER the country! Bush fires a few years ago hitting record numbers, we could go on and on... Without more and more initiatives like these windfarms, this is all going to worsen.

As for the local and social impact; the amount of work and jobs that will be created could only strengthen and build a community's economy and infrastructure.

I hope this letter helps in the support of rural wind farms

Yours sincerely,

David Grosmann
