

hi

I tried to send a submission but for some reason attachment gets blocked.

my submission is simple. as recent exercises around bruce springsteen and the rolling stones have shown corporate scalpers mostly in the uk and Switzerland e.g viagogo have shown they buy up big and have them on e bay within the hour. the soccer world cup has prevented this by requiring a passport number to buy tickets it can be done. obviously this is not suitable but tickets should be made with a requirement to have a valid Australian address entered and subject to tix limits this should give genuine fans a chance . and by the way the visa preferred status for springsteen was ineffective.

regards

shane o'connell
