

I'd like the opportunity to become a licensed producer/caregiver of medicinal cannabis, as I haven't had the opportunity to produce medicine due to current laws.  
I as well as many others use cannabis to treat my anxiety, depression, and insomnia.

Medicating with cannabis has increased the quality of my life incredibly, and I shouldn't have to feel like a criminal every time I try to obtain it.

I firmly believe that new laws need to be introduced so that people like me can become licensed producers of medical grade cannabis, so I can help others in dire need of natural, effective medication.

Phytocannabinoid therapy has proven to be effective with cancer, epilepsy, strokes, MS, physical injuries, insomnia and many other serious conditions.

It's time to join the rest of the world and introduce a system of legal cannabis. It will not only be profitable, but also it will benefit the community, and it will also protect the many innocent normal people who don't want to associate with criminals just to obtain their medicine.

Please make the compassionate decision
