---

TWIMC,

I hereby submit this email to the senate enquiry on the epic failure of Census 2016, further to earlier information on top of that provided to The PM., and other politicians(ALP and Greens,Xenophon) and to add to the personal phone call I made to the Minister Responsible office.(I have the details)

In short the risks and flaws as exposed (prior to census night) by learned scholars,the legal profession and millions on concerned Australian citizens led me to the conclusion that our personal data was not safe,nor private.Further I have already lost personal data via the ACCC 'secure' website, our ISP site,(email accounts hacked extensively and multiple times.Ebay,Paypal and others) so I have no reason to conclude any ABS site is safe from hacking.Nor do I necessarily support them selling our data without permission.I shall not be completing the census this year and it is highly unlikely I will engage in future ones.The data available for our household in other areas precludes the need to claim we need to be harvested.

I would like to attach further docs supporting my submission.I will await permission and instructions to do so.

I also give my permission for my emails to various politicians to be included if requested.And also the conversation with the Ministers office.As I have already indicated in many ways to others, ,my main gripe is the unconstitutional power which allows the ABS to bankrupt citizens to force/coerce or bully them into compliance.

Further I had declared our non-compliance before the census night and it was an emphatic and resolute NO,so I believe that for the ABS to harass us for a daily incremental penalty demonstrates how out of control their power really is.I have NEVER abstained from a census before.I cannot tolerate bullies.My father fought in WW2 and became a POW on the Burma Railway protecting our rights and freedoms from bullies and dictators.I intend to follow his lead by standing up against these ABS bullies.I will add that NO citizens should be fined for non-compliance,because the massive and intrusive changes to this years Census were almost virtually hidden from us,by time and by suppression of suitable disclosure.I am not working, and receive no govt support.So any penalty is likely to be served out.I cannot and will not compromise the health of our animals to waste \$180 per day on beauracratc blackmail.

Regards,
