

1. Monitoring Regime

Gaming machines in the Northern Territory exist within Casino and Community environments.

Skycity Casino

subject to standard casino regulation, gaming machines are monitored by the IGT Advanced Bonus System supporting both the X-series and ASP (crown) protocols.

Lasseters Hotel Casino

Gaming machines are monitored by the Aristocrat DACOM system supporting both the X-series and ASP (tacs) protocols.

Community

Gaming machines and Clubs and Hotels are monitored by a licensed monitoring provider, NT Tab Pty Ltd, utilising the OGLR QCOM protocol.

2. Data

Information relating to gaming machine performance is collected by this Office and selective data is published annually, refer www.nt.gov.au/justice/licenreg

3. Regulator / Venues technology/communication protocols

This Office has no direct technology based interface with gambling venues.

4. Pre-commitment work

Our policy unit is working with the Senior Officials Working Group in regard to desired outcomes.
