
Dear Senator Madigan

I support the Health Insurance (Certain Types of Abortion) Amendment Bill 2013. Our Australian Medicare money, is being used to finance abortions within Australia for gender related issues. Our Medical Practitioners are performing these abortions because of ethnic traditions or patterns within Australian ethnic society. This is extremely unfair to our Australian way of life, as we do not have problems with raising children in a country that provides for both genders of Australian citizens. Why should we pay for aborting these babies, because their parents want to have a gender related birth of their choice, this conflicts with our democratic society of freedom, if we were to have only children of gender choice, we would be no different than Hitler wanting a perfect race of people. We have been Australian for three generations and my Great Grandfather came from England to make a sure life for his family and worked very hard to build into this land, and the same for my Father who raised 8 children and worked hard for all of us both female and male. It is absurd to think that our way of life will be unravelled with the choice of gender within this great Country Australia. Are we to be a world of select criteria in gender (preferably male) or a world that has a great balance of people who are born not of gender select, but unity of male and female. Please do not allow this to happen, please stop some Ethnic Australians in choosing their way of life from backgrounds of countries which they came away from to start over again, in a place of freedom and refuge. We have this Australian freedom based on our decision of Moral values and democratic way of life for both male and female, that were placed long ago. Please don't let gender abortions proceed with our Australian Medicare Money.

Thank you
Regards
Debbie Pluck
