

Much of what you need to know about the impending change in the global climate (and especially in Australia's climate) is outlined in the two linked PDFs.

<http://regmorrison.edublogs.org/?p=668>

<http://regmorrison.edublogs.org/2012/03/01/nation-of-fringe-dwellers/>

Please read both of these texts very carefully.

If nothing is done to reverse the current trend in energy consumption and greenhouse gas emissions, all life on this planet will be under savage duress within the next hundred years. And our species will be on the verge of extinction.

Reg Morrison
