

As someone who has struggled with Infertility, I think any kind of abortion is completely abhorrent, but to think that '*gendercide*' is in some way being supported by Medicare makes me livid.

That a baby can be terminated/killed/disposed of because of their gender is bad enough, but to find out that within Australia, hard earned taxpayer dollars prop up this insanity - it is beyond my comprehension!

Medicare benefits should be for used for needed health procedures NOT for murdering babies because of their gender due to so-called cultural beliefs or personal preferences.

Every baby should be welcomed into the world, whether it is a boy or a girl, and the parent/s should consider themselves BLESSED because they CAN have children!!!
