

To the Senate Finance and Public Administration Committee,

Dear Senators,

I am writing to urge the Government and the people of Australia to respond urgently to the tragedy of Abortion and genocide in particular in both Australia and the world.

Every baby in the womb is precious to God and should be valued as a human being. Aborting a child for family balancing reasons is repulsive. It should not be supported by taxpayer funding. Every child should be welcomed whether it is a boy or girl.

Medicare funding should not be wasted, squandered, misdirected, spent irresponsibly on the killing of an unborn child. Australia should support the campaign by United Nations agencies to end the discriminatory practice of gender selection abortions. There are other humane ways of dealing with unwanted pregnancies than murdering these precious babies. Aborting their babies has a devastating effect on the mothers.

Sincerely,  
Joan Neuendorf.
