
Please fund **research** into M.E. and cater for severely ill patients who require home care, visits and support from medical professionals.

Australia's National Health and Medical Research Council has spent \$2.1 million on research since 2000 (according to figures in a to me letter from Health Minister, Susan Ley 2015), which is around \$130k a year. **This is not enough!**

94,000 people in Australia suffer and \$4 billion in lost earnings warrants more action!
