

To this rushed Senate committee, please wait for a more sober season to think through what damage you could be doing to our cherished rights.

To all those on Bcc, have we got it wrong and can relax?

As two citizens in their 80's who served in the Forces to protect our freedoms we feel this proposed so-called Human Rights and Anti-Discrimination Bill 2012 is a very serious threat to our freedom to think, and speak, that we value so much. Heaven forbid that we are gagged like so many Countries have been, and many still are.

Please don't proceed with this unforgivable step. We would have to outlaw the Labor Party that we have voted for in the past. I worked for 20years with the ABC and we personally knew Don Dunston well, and think he would turn in his grave at this ill thought out move.

Sincerely, Peter and Margaret Dormer
