

Inquiry: Health Insurance Amendment (Medicare Funding for Certain Types of Abortion) Bill 2013.

To Members of the Senate Committee,

Before abortion was removed from the Criminal Code in Victoria in 2008, abortions were being administered in private clinics and public hospitals regardless of its illegality. The law was a farce!

In 2007, the Herald Sun reported that 54 babies were born alive and left to die in Victoria. Since the decriminalization of abortion in Victoria in 2008, Channel 7 has reported a [600% increase in late term abortions](http://www.heraldsun.com.au/news/victoria/victoria-abortion-capital/story-e6frf7kx-1111116500184) at the Royal Women's Hospital.

<http://www.heraldsun.com.au/news/victoria/victoria-abortion-capital/story-e6frf7kx-1111116500184>

Now that abortion is legal in Victoria to **TERM, with a 600% increase** in late term abortions, it stands to reason that sex selection is being done.

<http://realchoices.org.au/abortion/victorian-late-term-abortion/>

If Down's syndrome pre-term babies and those with abnormalities are being culled; sex selection is being done.

If foetal reductions are being done; sex selection is a surety.

If abortions are being done for no other reason than that the couple is 'not ready for a baby' (main reason given to counsellors on counselling line and outside clinics), then sex selection is being done.

We have lowered the bar and anything goes now!!

We live in a hedonistic society, one in which the perfect nuclear family is idealised. With many cultures now living in Australia, with standard 1st trimester ultra-sounds the norm, sex selection is available even if the reason behind the abortion is conveniently altered.

When we allow the slaughter of the unborn because it is **LEGAL** we condone **ALL** abortions!!!!

I am not working extra this week to fund the killing of babies. And I am not supporting any political party that is silent about this abominating sacrilege that causes the desolation of whole societies.

Please make sex selection abortions illegal to begin the road back to natural selection and natural survival.
