

I support the total legalisation of cannabis/marijuana for medical and recreational use.

In particular for terminally/chronically ill and chronic pain sufferers, who can get significant relief.

I am diagnosed with chronic pain in my back and hip and have found no relief through prescription drugs.

I am prescribed opiates by my doctor, known to be addictive, but they also cause me digestive issues. I have used cannabis overseas effectively to alleviate my symptoms.

It is time for Australia to find compassion over dogmatic belief in historical misinformation.
