

JOINT SELECT COMMITTEE ON AUSTRALIA'S IMMIGRATION DETENTION NETWORK

Q10

Detention Centre Plans and Facilities

Question:

Provide a complete breakdown of staff by occupation/role, engaged to perform functions in each of the Immigration Detention Centres including:

- a) How many SERCO staff are currently employed at each detention centre?
- b) How many DIAC staff are currently located at each detention centre?
- c) How many IHMS staff are currently located at each detention centre?
- d) How many contractors provide services on site at each detention centre over a six month period?

Answer:

- a) Serco has provided the following answer in response to part (a) of this question:

Serco management continuously reviews and, as necessary, amends staffing arrangements at all sites in the national immigration detention network to ensure that staffing levels are appropriate and sufficient to allow Serco to meet its performance obligations under the Contract. The levels of staffing at any particular site therefore vary from time to time depending a number of factors including on the number and needs of the clients accommodated at that site at any particular time.

There are operational and security sensitivities around disclosing precise numbers of Serco staff at a particular site in the detention centre network. Accordingly, Serco and DIAC have agreed that information regarding specific staffing levels is confidential to Serco and contractual protections are accorded to this information (Schedule 10 of the Detention Services Contract).

DIAC comment: The department recognises that the provision of this information is an issue for the Committee. The Secretary wrote to the Committee Secretary on 5 August 2011 seeking the Committee's views on requests for sensitive information to be heard in camera.

- b) Please see the table below, which shows the number of DIAC staff at each detention facility as at 30 June 2011.
- c) The department's contracted health services provider, International Health and Medical Services (IHMS), has provided the attached tables, which show staffing levels at each detention facility as at 30 June 2011.
- d) The total number of all contractors at immigration detention facilities, either directly contracted by the department or indirectly subcontracted through Serco or another primary contractor, will vary between any six month period of time. The department does not keep figures on the number of contractors at each site.
