

---

I am appalled that this government or any other government funds abortions.

I don't want my tax money going to fund other peoples contraceptive choices.

80,000 plus abortions are carried out in Australia. this is a scourge to our country.

I would be most pleased to see the practice of medicare funding scapped in application to any abortion and in most particularly in gender selection.

There are only few diseases that are carried through on gender, but many undesired traits such as sticking out ears. if we start to kill off every imperfect human in our perceptions then we may very well not exist all.
