To whom it may concern,

I am writing to support the Health Insurance Amendment (Medicare Funding for Certain Types of Abortion) Bill that would remove Medicare funding for sex-selection abortions.

I was absolutely appalled to find out that Medicare currently funds abortion, and as a taxpayer I strongly believe that funds could be allocated to many other critical health issues affecting our country. Both me and my family suffer from numerous illnesses, and have to pay a lot of out of pocket expenses to fund these medical bills because they are not subsidised by Medicare.

Medicare funding should be for medical related procedures – not terminating the life of a human that has no capacity to protect or speak up for itself. Preventing unborn babies from being born because of their sex is an act of gender discrimination.

I am very passionate about this issue and would be happy to discuss this in more detail.

I appreciate your time reading my submission.
