Ref: Medicare Funding for Certain Types of Abortion Bill 2013

For Medicare to support abortions solely because of the sex of a child is akin to “ethnic cleansing” as far as I’m concerned.

To allow the offer of medical /health benefits to ‘cross the line’ and include cultural / ethnic group preferences for male children as opposed to female children is totally unacceptable. Use Medicare benefits for health procedures, NOT gender selective abortions (or any abortions at all!)

Come on Australia. Get alongside the United Nations in their fight against genocide, and refuse Medicare support for gender selective abortions!
