

Hi, my name is Allan Barrett and I am a director/licensed real estate agent for Portland Seaview Real Estate and I am writing in regards to the wind farms in the area and I believe they have not affected the current real estate market, in recent times we have had people ask for properties with views of the wind farms because they believe it provides an interesting view.

I am aware there are some concerns with the views of the wind farms, however in my experience this has been minimal overall compared to people that enjoy the view of the wind farms.

Thanks and kind regards,
Allan
