Committee, Electricity Prices (SEN)

Submission to Inquiry

We have recently received our first electricity account since the introduction of the Carbon Tax. This account is \$230 more than the previous account despite using the same amount of power. Our supplier is Country Energy in Central NSW.

Our account for this period is \$730 compared to \$493 for the corresponding period last year.

We are in a financial position to be able to pay this amount but we despair for people who are not.

We will eagerly await the outcome of your inquiry.

Ray and Margaret Davis.
