To Whom it may concern,

I have lived at Waubra for 55 years. It was a peaceful, healthy place to live. But since the turbines were switched on at the Waubra wind farm I now have health problems. With headaches, tinnitus, high blood pressure and sleepless nights.

The turbines have been placed too close, so houses can be very noisy sometimes.

Red lights shine into the bedrooms at night and there is flicker during the day.

Some turbines are only 53 metres from boundaries.

I now travel to Ballarat every night just to get a good night sleep.

I have lost my quality of life.
