

---

The unacceptability to Australians of the use of medicare funding for the purpose of gender selection.

I believe it is extremely irresponsible to force Australians to have their medical insurance used to fund gender selection abortions. Many post abortive women have been traumatised by abortion, if they have to fund abortions for the sole purpose of that the said mother or father would prefer their child to be of the opposite sex that they have conceived and knowing that obviously the child would have to be developed enough to determine the sex, could cause mental health issues within our community. I would find it difficult to wake everyday if I knew my health insurance was being used for such a heartless and inhumane reason.

Please consider our well being.

Sincerely

Michelle Fraser
