This submission applies to Senator John Madigan's

**Health Insurance Amendment (Medicare Funding for Certain Types of Abortion)  
Bill 2013**

As an Australian taxpayer I oppose the use of taxpayer Medicare monies used for non health care medical procedures. The termination of a life due to cultural or personal preferences should not be funded by a community where the majority of the community is opposed to abortion based on gender.

Medicare monies should not be used on a personal preference procedure which will have the consequence of unbalancing the society of gender equality.

Every child needs to be welcomed into a fair society not based in its gender.

This bill has my (and most Australians) support.

Regards,
