

My name is Jessica Stanford and I am writing in discussed to the Murray darling basin authorities I have lived in country NSW all of my life and seen drought for all but most of it I am 19 years old and work at B&W RURAL a business which would be affected by this draft plan My job is based on irrigation and farming activity

and there for this would be a huge loss for the town of Moree NSW the business is made up of a lot of reliance from farmer you take our water and no one will have nothing that's including weekend hobbies like skiing. My family work on a farm which would mean that we might lose our livelihood as well.

I am on the Moree show society committee which would also be affected by this. All of the towns affected by this would become ghost towns because no one will want to visit because there will be no WATER

**Kind Regards**  
**Jessica Stanford**
