

Deploy the Ultimate Superpower – -Qi¹ (life Energy) Within Us to Deal With the Superbugs

Dr. Rey Tiquia PhD
Federally Registered Practitioner of
Traditional Chinese Medicine
Melbourne, Australia

The word ‘superbug’ is a colloquial English term that refers to microorganisms (bacteria) that has become resistant to antibiotics and thus has become ‘exceptionally’ stronger for our immune system to deal with effectively.

The emergence of superbugs signifies that the old way of dealing with ‘bugs’ i.e. with antibiotics is not working. To deal with this new biological entities, we need a new way of thinking i.e. a new paradigm, a new science that juxtaposes the interests of the patient, the health practitioner and the mind-body humoral remedies or yao that are being used to deal with seasonal bugs ²and superbugs or antibiotic resistant microorganisms. Yao 藥 are routine therapeutic practices that move the patient’s *qi* including chronoacupuncture,
