

Dear Senators

I would like to let you know that I am against the medicare funding of some abortions such as gender abortions. Please do not go ahead with this! There are already so many babies being killed in Australia which makes the womb a dangerous place to be in. Funding this will make abortion even more readily available and these children will have no say over their lives even before they are born. Shame! Thank you for your attention. It is much appreciated.

Kind regards
