Health Insurance Amendment
(Medicare Funding for Certain Types of Abortion) Bill 2013

I totally support the amendment proposed by Senator Madigan to ensure that Medicare does not fund sex-selection abortions.

I totally oppose the murder of unborn babies for any reason and believe Medicare should cease funding ANY abortion.

To think that we could even consider being a society that legalises killing children because they are the “wrong” gender is utterly reprehensible and barbaric.

Allowing Medicare funding for any abortion (murder) is tantamount to participation in it, and any government/political Party supporting such an idea, and any MP not prepared to vote against such an idea, deserves the greatest of condemnation from society and would certainly NEVER get my vote.

The idea of killing an unborn child in the name of 'family-balancing' is inhuman. Using Medicare funding for such a purpose would simply makes everyone in the nation complicit in such evil choices. That idea is preposterous.

I rarely support the United Nations, but in this case the agencies set up to end the discriminatory practice of gender-selection through implementing disincentives for gender-selection abortions' are to be congratulated and supported.

Thank you for the opportunity to have some input into this process.

Peter Stokes
