**Wind Farm Senate Inquiry**

I've worked at Keppel Prince in wind tower manufacture and steel fabrication for the past four years.

I would like to put my support for wind farms in rural areas on the record because I can personally see the benefits they bring, including jobs, investment, tourism and community funding.

I also have no problem with how they look and in fact think that they add something to the scenery. I frequently see people stopped at Codrington or Yambuk taking photos of the towers.

Regards,

Adam Currie
