

Dear Sirs,

I am writing regarding the very disturbing practice in other countries concerning abortions based on gender selection. This cannot and must not be allowed to happen in our nation of Australia.

The United Nations has issued the disturbing news that due to gender selection now countries like India and China are missing something like 200,000 million girls!! This means that girls are now married off earlier to insure their boy has a wife or else brothers will share a wife!!

It is appalling that in 2013 in a country where we would consider ourselves well educated and 'moral' people we would even be having this discussion. We are using electronic devices for evil instead of good. I would not agree to using our taxes in support of this practice. We will live to regret it.

Please, those of you who have the power to stop this – do so in the most definite way.

Surely we cannot allow parents to use our Medicare system to abort when the baby is not the sex they wanted. What if a couple continues having boys/girls – how many are they prepare to abort?

This is very distressing.

Sincerely,  
Mrs Erica Grace
