

Dear Sir/Madam,

**Re: Senate Enquiry into wind farms**

My wife and I live on a farm about 1km from wind towers, and would like to make a few points about our experience:

- We have not experienced any adverse health effects as a result of living in such close proximity to the towers.
- We do not experience excessive noise or feel any vibrations at all from the wind farm.
- We do not believe the presence of wind towers would adversely affect farm income. Sheep and cows graze right underneath the towers.
- Nearly every day, many cars stop along the Princes Highway to take photos of the towers. We can see 9 wind towers from our dining room window, and all family and friends who visit say how relaxing they are to watch.
- If I could get 4 wind towers on my farm I would be happy. They are a great asset to Yambuk and Codrington.

Regards,

John Leddin
