Submission:

I write to seek the Inquiry's support for rural wind farm developments.

Hepburn Community Wind Farm have made a strong case for the community benefit of such enterprises, such that our family self-managed super fund is an investor and we are strong supporters. I urge you to attend to the arguments they have presented.

Means, such as loan or interest guarantees, to encourage super funds to invest in such renewable energy initiatives should be considered by your Inquiry as a particularly appropriate means of encouraging inter-generational equity in the process of moving to a low carbon economy.
