dearsenators

my name is julie morgan-thomas

i spoke yesterday in brisbane at the inquiry....what i would like to know is why so many women had their babies removed from them ...in the aboriginal inquiry we realised that those children were removed by a government policy to assimilate the whites so a govt did this they think its ok to go and steal peoples children from them....in adoption they removed newborns from their mothers white

and blacks also mostly whites was this done to remove the unwed mother or was this done to supply infertiles with babiesi myself think the latter they set up unmarried mothers homes for single women when we think about it we were all women single and pregnant anyway regardless of marriage so i think this was just used as an excuse i think they just took babies from mothers to feed the infertile couples.....in fact the more i have come to learn

the more i am sure of the fact that babies were removed from women to create families where there was none they stole those babies and

put them with married couples and the family got how many what gives them the right to go and steal babies from women in hospitals

in the first place....who had the bloody right to our children and then the govt used adoption consents and births deaths and marriages also govt depts there is no doubt in my mind the govt is

guilty of this crime NO DOUBT the aboriginal people were right it should be squashed and called kinship because every child has the right to be with its own family you were a signature to the hague convention so you broke that law too.....the rules of kinship are easy the children get to remain in the family where they belong it is time the govt dept bow out of peoples family life...we are all

people and we can look after our own children its time for the govt

to get out of peoples lives please abolish adoption and make it
