
To whom it may concern,

As an Australian citizen, I am absolutely disgusted with this proposal, of aborting for gender selection.

I am sending you this email as my petition against abortion for sex selection, being passed as a law. I also am petitioning against the use of tax payees money, and against Medicare funding for the abortion procedure.

I do not see the medical purpose to support such a law being passed through parliament. Nor do I see the use of tax payers money, (Medicare),

As a smart or necessary move, to help gain budget surplus, at this point in time.

With all the cuts to funding, that are being made, why introduce this selected sex abortion law?

I thought that we needed to grow our population, and profit.

Not reduce our population, and waste money through 'cosmetic' Medicare procedures.

Is there to be mandatory counseling, to also burden our health care system, when one options to abort?

Please hear my protest against sex selection abortion.

Regards,
