

To the Senate Enquiry:

Health Insurance Amendment (Medicare Funding for Certain Types of Abortion) Bill 2013".

Firstly, let me say thank you to all those who have been a part of creating such a great country as Australia.

One of the core values that has enabled Australia to be great is the recognition we have given to a human life.

Gendercide, in its core essence, is trying to allocate different values according to gender. We have spent so much time, money, resources, research, emphasis trying to eliminate this gender-value in other areas. Why would we undermine ourselves in this area?

Medicare, instituted by previous Government to ensure all people had access to basic medical services, as a Government Agency, needs to support Australian policy, not undermine it. Medicare benefits should be for needed health procedures and its resources not wasted, including in the elimination of babies because of their gender.

Thankyou
