To Whom It May Concern

I have just read about the Health Insurance Amendment Bill 2013 (concernng Medicare funding for certain types of abortion) and I would like to say I support it 100%.

I think it abhorant that we are allowing couples to abort on the grounds of sex selection. I knew this was a wasteful throw away society today but I did not realise it had become that bad here in Australia (we have no right to point fingers at China!). Please dont direct our hard earned tax dollars towards these non-essential procedures. Come on Aussie - come on!

Thank you for your time.

Helen Long
