

Our family is against this gas seam mining, cultural land sell off.
We think we, the people of australia should be able to cultivate our land for our own benefit to feed our people and not to be developed into farming land for the overseas people. Gas seam mining is proving to be a very unhealthy project, we need our water clean and not contaminated by this method of drilling and mining.
Please save our country from any more of this. Stop selling our soverinty.
Please look after the people of australia, please put us first. Greed can be a very vicious and horrible thing. We can see our beautiful country going third world each and every day. We the people of australia need to go back to the polls and vote these people out of office and have our say on how we want our beautiful country governed. Please give us back our democratic right bring on another election before there is no australia left.
