

To The Community Affairs Reference Committee,

Please allow us to have our Wind Farms. The majestic turbines turning in the breeze day and night.

Clean Green Energy

Like it or not the evidence of global warming abounds, extreme in weather at both ends of the world.

Do Climate Change sceptics ever wonder if perhaps they are wrong? As a climate change believer I would gladly do so. On the subject of health problems do the so called sufferers know that the wind drives the turbines not vice versa and even without turbines wind is noisy?

I believe with a Labour Federal Government we will get our approved Crowlands Wind Farm.

Thankyou for giving me the opportunity to send a submission.

(Mrs) Helen M. Darbyshire
